

Welcome to the Betsy webshop user guide.

Basic use

Go to your terminal, enter **py** and press enter.

Type **import main** and enter

Now you can use the available functions

some examples:

main.search("red") to search for matches with the word "red".

main.list_products_per_tag(2) to search for products with "tag id2.

main.list_user_products(2) to search for products from user with id3

Test use

You can use the test function to test the WINC required functionality of the Betsy webshop.

Go to your terminal and type **python main.py**

The required functions will be tested one by one including invalid function tests.

Delete or create Betsy webshop database

It is also possible to delete or create a clean Betsy webshop database.

Go to your terminal, type **py** and press enter.

Type **import setupdb** and enter

setupdb.delete_database() will delete the database.

setupdb.create_test_data() will create the database.

**Thank you for your interest in
Betsy webshop**
